CV current as of 1 September 2021

## Education

2020–2022 **Master of Science in Industrial Engineering**

(current) University of Central Florida (UCF), Orlando, Florida, USA

Expected May 2022

2016–2020 **Bachelor of Science with University Honors, double-major in Computational Mathematics and Computer Science, minor in Anthropology, Cum Laude**

Utah State University (USU), Logan, Utah, USA

Honors thesis: *Computationally revealing recurrent social formations and their evolutionary trajectories*

## Supplemental courses

January 2021 **Agent-Based Modeling of Social-Ecological Systems, CoMSES Net International Winter School**, Arizona State University.

## Publications

2021 **Miranda, L.** & Garibay, O.O. Evolutionary model discovery of factors driving  
(In progress) decision-making in an irrigation experiment. Invited to submit as part of a special edition of the *Journal of Artificial Societies and Social Simulation (JASSS)*.

2021 Freeman, J., Baggio, J., & **Miranda, L.** Kinship moderates energy use in human  
(In progress) polities. Intent to submit to *Proceedings on the National Academy of Sciences (PNAS)*.

2021 Bird, D., **Miranda, L.**, Vander Linden, M., Robinson, E., Bocinsky, R.K., Nicholson, C.,  
(Accepted; Capriles, J., Finley, J.B., Gayo, E., Gil, A., Guedes, J.d'A., Hoggarth, J., Kay, A., Loftus,  
revisions E., Lombardo, U., Mackie, M., Palmisaano, A., Solheim, S., Kelly, R.L., & Freeman, J.  
submitted) p3k14c: A synthetic global database of archaeological radiocarbon dates. *Nature Scientific Data*.

2021 **Miranda L.** & Garibay O.O. Multi-agent Naïve Utility Calculus: Intent Recognition in  
Awarded Best the Stag-Hunt Game. In: Thomson R., Hussain M.N., Dancy C., Pyke A. (eds) *Social, Human-Autonomy Cultural, and Behavioral Modeling*. SBP-BRiMS 2021. Lecture Notes in Computer  
Teaming Paper Science, vol 12720. Springer, Cham.  
[https://doi.org/10.1007/978-3-030-80387-2\\_32](https://doi.org/10.1007/978-3-030-80387-2_32)

2020 **Miranda, L.** & Freeman, J. The two types of society: Computationally revealing recurrent social formations and their evolutionary trajectories. *PLoS One* 15(5): e0232609. <https://doi.org/10.1371/journal.pone.0232609>

---

## Presentations

- 10 June 2021 Evolutionary model discovery of behavioral factors driving decision-making in an irrigation experiment. *Inverse Generative Social Science (iGSS) Workshop 2021*.

---

## Research Experience

- August 2020 - **Graduate Assistant.** *University of Central Florida Human-Centered Artificial Intelligence Research Laboratory & Complex Adaptive Systems Laboratory.* I have served the full duties of a Graduate Research Assistant every semester of my program.
- August 2019 - **Undergraduate Research Assistant.** *Utah State University Anthropology Program.*
- August 2020 (1 year) As part of an international archaeological working group known as PEOPLE 3000, I helped to create and manage a new radiocarbon database larger and more complete than any other. I also worked to program and test an online social experiment studying cooperation in a common-pool resource management scenario.
- Summer 2019 **Peak Summer Research Fellow.** *Utah State University.* One of ten recipients awarded a \$4,000 USD fellowship for highly-engaged undergraduate researchers to conduct work on a proposed project over the summer. The research conducted under this fellowship produced my first publication, listed above.
- Summer 2018 **NASA Space Grant Consortium Fellow.** Awarded \$1,600 USD fellowship to continue work on a CubeSat mission as the software team leader for the USU Get Away Special Microgravity Research team. Managed a team of ten other programmers. Wrote software for a high-altitude balloon payload that successfully served over a dozen flights. Project is set to launch into low Earth orbit aboard a Falcon 9 in December 2021.

---

## Teaching Experience

- August 2020 - **Graduate Teaching Assistant.** *University of Central Florida Data Analytics MS Program.* I have served as a GTA for the following courses:
- Fall 2021 STA 5206 Statistical Analysis  
Spring 2021 STA 5703 Data Mining Methodology  
Fall 2020 COP 6526 Parallel and Cloud Computing
- Jan 2018 - May 2019 (3 semesters) **Assistant Lecturer / Recitation Instructor.** *Utah State University Department of Mathematics and Statistics.* Worked as an assistant lecturer / recitation instructor for the Differential Equations and Linear Algebra course at USU. Gave original lectures twice-weekly alternating with thrice-weekly lectures by the primary lecturer. Held office hours, created numerous course materials, and designed exam questions.

---

## Scholarships

- Summer 2018 **Honors Study Abroad Scholarship.** Received a \$1,000 USD scholarship from the USU University Honors Program to use towards a semester studying historical art and theatre in Italy, Switzerland, France, and the UK.
- 2016-2020 **Daniels Scholarship.** Received the full-ride Daniels Scholarship (final award amount: \$58,136 USD) to attend any four-year Bachelor's program in the USA for demonstrating exceptional leadership ability, strength of character, and commitment to community betterment. I was required to keep the Daniels Scholar Code of Conduct and work a paid position for at least ten hours per week during every semester to maintain the scholarship.

---

## Work Experience

- May 2017 - Oct 2017 (6 months) **Embedded Engineering Asisstant.** *Space Dynamics Laboratory, Logan, Utah, USA.* Developed software for autonomous reconnaissance systems in C++. Built a technology demo showcasing a surveillance platform which toured the U.S. to help garner funding. Developed, documented, and standardized methods for in-house Linux distribution management that continued to be used after my departure.
- August 2016 - May 2017 (2 semesters) **Computer Science Tutor.** *Utah State University Department of Computer Science.* Tutored students in introductory computer science courses. Primarily assisted with homework concepts and code debugging.

---

## Awards

- July 2021 **Best Human-Autonomy Teaming Paper.** Social, Cultural, and Behavioral Modeling. *SBP-BRiMS 2021.*
- Spring 2018 **Outstanding Undergraduate Oral Presentation** in the discipline of Life Sciences, presented on Aleut population modelling project listed above. USU Student Research Symposium.
- Fall 2017 **First-place Hackathon Prize.** Led a team of 3 other programmers over the span of just 36 hours to create **Will A.I. Shakespeare**, a Python/NLTK based program that procedurally generates Shakespearean sonnets. The project won first place at the largest intercollegiate Hackathon in Utah, *HackUSU*.

---

## Undergraduate Research Projects & Presentations

- Fall 2018 **"Optimized Development of a Mars Energy Infrastructure"** Developed a machine learning method that optimizes the shipment of renewable energy infrastructure to Mars in a manner that ensures the sustainment of a large human settlement. Cumulative project of CS 5810 *Machine Intelligence in Clean Energy*. Presented in a departmental symposium.

2017-2018 **“Mathematically Predicting Aleut Population using Archaeological Data”**

Constructed a dynamical model of human-resource interaction to explain historical population changes among the Aleut of the southern Alaskan peninsula. Presented to Utah state legislators in Salt Lake City, Utah, as part of *Research on Capitol Hill*.  
<https://digitalcommons.usu.edu/roch/89/>

Spring 2017 **“OpenSPA: an Open-Source Software Solution for University SmallSat Teams”**

Developed an open-source command-and-data-handling software for embedded satellite systems targeted towards the needs and ability of undergraduate space engineering teams. Presented project at the USU Student Research Symposium. Available via USU Digital Commons.

---

## Undergraduate Extracurricular Organizations

Summer 2016 to **USU Get Away Special Microgravity Research Team.** Worked on a long-running

Spring 2019 CubeSat mission as part of an all-undergraduate research team. Received NASA  
(3 years) fellowship listed above. Managed a team of ten other programmers. Wrote software for a high-altitude balloon payload that successfully served over a dozen flights. Project is set to launch into low Earth orbit aboard a Falcon 9 in December 2021.

Fall 2017 to **Society of Women Engineers (SWE), USU student chapter.** Served as the society

Spring 2019 Treasurer. Budgeted and managed a financial account with a balance that regularly  
(4 semesters) exceeded \$20,000. Presented to organizations in order to acquire further grants. Money was used to fund K-12 STEM outreach, professional development for club members, and promoting diversity in engineering. Volunteered numerous hours to outreach.

Fall 2016 to **American Institute of Aeronautics and Astronautics (AIAA), USU student chapter.**

Spring 2018 Served as society President during the 2017-2018 academic year and as  
(4 semesters) Vice-President during the 2016-2017 academic year. Coordinated all club activities, including K-12 STEM outreach, professional development events, fundraising efforts, and social activities.

Spring 2018 **USU Competitive Rocket Team.** Rocket targeted the 3,000m altitude mark.

Prevented a test-flight after discovering a fatal design flaw in the air brake system. Modeled and optimized the brake system; parts were re-machined based on my specifications. Built/programmed the flight computer, and successfully provided remote troubleshooting to fix an issue with the computer at a critical time during the Spaceport America Cup competition.

---

## Skills

Programming Python (plus pandas, numpy, scipy, matplotlib), NetLogo, JavaScript, Haskell, C++

Software Linux, Git, Vim, L<sup>A</sup>T<sub>E</sub>X, Excel

Languages English (native; CEFR C2), Swedish (conversational; CEFR B1)

Sailing ASA-certified keelboat skipper
